ABOUT ME

I am a graduate of the Information Systems Program at Gunadarma University with an interest in Full Stack Web Development and Data Analytics. Experienced in developing and maintaining web-based applications using HTML, CSS, JavaScript, React, Next.js, PHP, Laravel, Node.js, and MySQL. Also experienced in data processing, analysis, and visualization using Python, Excel, Looker Studio, Tableau, and Power BI. Possess strong problem-solving, analytical thinking, teamwork, communication, and adaptability skills.

ORGANIZATIONAL EXPERIENCE

BEM FIKTI UG

Staff of Information Technology Development Bureau, November 2023 – September 2024

- Responsible for designing and developing the official BEM FIKTI UG website.
- Maintained the system and ensured the website functioned properly both functionally and visually (UI/UX).
- Managed and updated the website, including content updates such as work programs, important organizational information, event details, and program documentation, while ensuring all displayed information remained relevant and up to date.

WORK EXPERIENCE

Gunadarma University Information Systems Laboratory

Laboratory Assistant, March 2024 – September 2024.

- Explained practical materials to students and guided them through hands-on laboratory sessions.
- Provided technical assistance when students encountered difficulties during practical sessions.
- Assessed students' practical work and submitted reports.

Gunadarma University Psychology Laboratory

Programmer, August 2025 – August 2026.

- Worked on website development projects with a team, such as the Psychology Laboratory CMS Website and Laboratory Inventory Website.
- Assisted with Psychology Laboratory practical sessions, particularly computer-based activities, and provided technical support during the sessions.

EDUCATION

GUNADARMA UNIVERSITY, (Tangerang, Indonesia)

Information Systems, 2022 – 2026

- GPA: 3.87

SKILLS & COMPETENCIES

- **Programming:** Python, Java.
- **Database Management:** MySQL, Oracle, Supabase.
- **Data Visualization:** Microsoft Excel, Google Sheets, Looker, Tableau, Power BI.
- **Web Development:** HTML5, CSS, JavaScript, PHP, React, NextJS, Tailwind, NodeJS, Laravel.
- **Tools & DevOps:** Git, Github, Docker.
- **Team Communication:** Strong communication and ability to work collaboratively within a team.
- **Adaptability:** Able to quickly adapt to changes, new situations, and challenges.
- **Responsibility:** Responsible and committed to completing tasks effectively.

DATA ANALYSIS PROJECTS

- **E-Commerce Orders Uday Malviya:** A data analysis project focused on identifying products with the highest revenue contribution, the effectiveness of marketing channels, and customer payment method preferences. Key activities included data collection and preprocessing, data cleaning, correlation analysis, data visualization, and developing business insights and recommendations based on the analysis. Tools used include Python (Pandas, NumPy, Matplotlib, Seaborn), Google Colaboratory, and Looker Studio.
- **Ford GoBike Data Analysis:** A data analysis project focused on analyzing user characteristics, service usage patterns, and stations with the highest demand. Key activities included data collection and preprocessing, missing value handling, outlier detection, duplicate data checking, data analysis, user distribution visualization, and developing business insights and recommendations based on the analysis. Tools used include Python (Pandas, NumPy, Matplotlib, Seaborn), Google Colaboratory, and Looker Studio.
- **Web Sentiment Analysis:** Developed a web-based application to analyze user reviews of the Octo Mobile application using IndoBERT and LDA methods. Key features included dataset uploading and retrieval, data preprocessing, sentiment analysis and classification, sentiment distribution visualization, and topic modeling to identify key topics and their distribution.

WEBSITE PROJECTS

- **BEM FIKTI UG Website:** Official platform for the Faculty of Computer Science and Information Technology student organization at Gunadarma University, designed to provide information and publish programs such as HEROES, TechnoFair, FIKTI Space, FIKTI Learning, and PEMIRA.
- **E-Baca:** Web-based online library project designed to provide users with access to digital book collections, including book search, e-book reading, offline downloads, and a recommendation system based on user interests and reading history.
- **Warung Putri Inventory Website:** Web-based application developed to manage store inventory, including recording incoming and outgoing goods, searching by product name or category, CRUD functionality, and downloading inventory reports.
- **PSI App:** Web-based application developed to support Psychology Laboratory operations, including programmer data, task management, and programmer standby schedules.
- **Hadirin:** Web-based application developed to support employee attendance administration, including attendance tracking, leave and permission requests, and attendance history monitoring.
- **HPP Calculator:** Web-based application developed to calculate production costs and selling prices, including raw material, labor, overhead, profit margin, and profit calculations.
- **Servis Tracker:** Web-based application developed to manage vehicle service and repair records, including vehicle management, repair history, expense tracking, search, filtering, authentication, and data access control.

CERTIFICATION

- **Data Analyst Certification** - LSP Gunadarma University, Licensed by BNSP

TRAINING

- **Introduction to Data Analysis** - MySkill (2023)
- **Fundamental Web Programming** - Lepkom Gunadarma (2023)
- **Go-Lang for Beginner** - Lepkom Gunadarma (2024)
- **Java Programming for Beginner** - Lepkom Gunadarma (2024)
- **Go-Lang for Intermediate** - Lepkom Gunadarma (2025)
- **Java Programming for Intermediate** - Lepkom Gunadarma (2025)
- **Data Preparation for Business Processes** - Gunadarma (2025)
- **Creating Business Intelligence** - Gunadarma (2026)
